ANDROID POI CATALOG

Discover which terminals are compatible with our solutions.

OPEN PAYSOL®'S APPLICATIONS

MYPAYSOL®

This is an Android payment application. It is multi-protocol and enables remote parameterization of the POS terminal. It can handle payments in tracks, manual, chip and contactless modes.

PAYKIOSK®

It allows you to manage and centralize the configuration of Android remote payment terminals as well as the other mobile applications in the application suite.

SCAP

This is an application for communicating with cash register software, so it provides a direct link between the cash register and the payment application. This application acts as an interface between the cash register and the payment application.

VAULT

This Android application allows you to load a master encryption key into the secure space of the remote payment terminal.
